

Do government photovoltaic subsidies affect enterprise independent innovation in China?

Achieving a green, low-carbon economy necessitates clarifying the impacts of government photovoltaic (PV) subsidies on enterprise independent innovation in China. This study constructs a tripartite evolutionary game model among government, enterprises, and energy regulatory service centers (ERSC).

Do government subsidies promote Enterprise Innovation in the PV industry?

The purpose of this research is to explore the impacts of government subsidies on promoting enterprise innovation in the PV industry in pursuit of renewable energy goals. Theoretical analysis show that government subsidies play an essential role in promoting enterprises innovation.

Does R&D intensity capture innovation in PV Enterprises?

novation of PV enterprises. As R&D intensity captures the innovation in PV enterprises. In prior literatures [43,49],the R&D investment to the total sales revenue. Considering the intensity. by the government to support PV enterprises. Since en- innovation decisions. Here,GSs are divided into R&D subsidies and non-R&D subsidies.

Why do PV Enterprises need R&D subsidies?

Since the environmental externalities and knowledge spillover cannot be fully compensated by the market price,innovation in PV enterprises may encounter "double externality problem"[8,9]. Thus,R&D subsidies are critical for PV enterprises' innovation.

Do state-owned PV Enterprises have a strategic priority?

Since state-owned PV enterprises have a greater need to serve government objectives to secure legitimacy,the government should also emphasize the strategic priority of innovationrather than production explosion to stimulate the R&D efforts of state-owned PV enterprises.

Does rdsb promote innovation in PV Enterprises?

This is similar to the results found in Korea and Germany [12, 53]. A possible explanation is that RDSb in China has created favorable conditions for the innovation in PV enterprises through reducing innovation costs directly and even has encouraged the innovation in PV enterprise for the sake of honor.

This is a concerted, global effort to fight against climate change. Singapore, a small and resource-scarce city-state, is no exception, and the island is now home to one of the world's largest offshore floating Photovoltaic (PV) farms, a 5 MW ...

With its advantages of light weight, high strength, corrosion resistance and durability, aluminum is widely used in building solar panel frames and photovoltaic supports. Research shows that ...

# 21021 Photovoltaic support enterprise

D2150-10-LI-PV Sensing Units: Access product manuals, HedEx documents, product images and visio stencils. ... Enterprise products, solutions & services. Huawei Cloud. Cloud products, ...

This research aims to help photovoltaic enterprises to enhance their technological innovation inefficacy, and to provide the government ideas to implement differentiated industrial support...

Company Introduction: Taizhou Suneast New Energy Technology Co., Ltd is a high-tech enterprise specializing in solar photovoltaic bracket design, production, installation and related ...
