

Who is energy365?

Established in 1999 by Kevin Moon energy365 is an independent geoscience consultancy advising upstream oil and gas companies on business development primarily through asset acquisitions and disposals. Core skills include extensive knowledge of international oil and gas exploration and project and asset management.

How much electricity does Uganda use?

While electricity represents only around 2% of Uganda's total energy consumption, over 80% of generating capacity is based on hydropower. Most of the remainder is also renewable, including several solar photovoltaic (PV) installations and thermal power plants that burn sugar cane bagasse.

What are the different types of energy sources in Uganda?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. Uganda: How much of the country's energy comes from nuclear power?

What percentage of Uganda's energy comes from oil?

Oil accounted for less than 10% of Uganda's total energy supply in 2021, with all oil products being imported through Kenya and the United Republic of Tanzania, and primarily used for transport. Uganda's first commercial oil discovery occurred in 2006 in the Lake Albert basin.

What percentage of Uganda's Electricity Generating capacity is renewable?

Approximately 92% of Uganda's generating capacity is renewable, of which about 80% consists of large hydro, 8% sugar cane bagasse-fired plants and 4.5% solar PV plants. Uganda aims to increase its non-hydro renewable electricity generating capacity, particularly from solar.

Does Uganda need a solar power system?

Uganda aims to increase its non-hydro renewable electricity generating capacity, particularly from solar. It introduced PPAs with feed-in tariffs for renewable energy projects under 20 MW in 2007. Individual and commercial solar systems can help the government meet its electrification targets and spur economic development in rural areas.

The need for renewable energy in Uganda has been highlighted through comparison of future demands of fossil fuels and the renewable energy resources. ... Barrels per 365 days (year) ('000's ...

We fight energy poverty and climate change with projects and technology that benefit those most vulnerable to climate risks. Partner with us UpEnergy builds high-quality decarbonization projects that improve lives. ... Uganda. ...

Job Title: Field Sales Agents (100 Jobs) Organisation: African Clean Energy (ACE) Duty Station: Arua, Uganda About Organisation: African Clean Energy (ACE) is a B-Corp certified enterprise that produces and distributes the ACE One solar-biomass hybrid energy system.

Duty Station: Kampala, Uganda . About US: Vivo Energy is the company behind the Shell brand in Africa and is jointly owned by Vitol, Helios Investment Partners and Shell. Vivo Energy plc, commonly referred to as Vivo Energy, is a downstream petroleum company with its headquarters in the Kingdom of the Netherlands. It maintains subsidiaries and ...

DGR Global and Armour Energy have established a new UK-incorporated company, Conjugate Energy, which will hold interests in oil exploration projects in the Albertine Graben, Uganda. Conjugate intends to seek admission to a UK stock exchange and raise funds primarily to drill two exploration wells or drill ready prospects with substantial resources of oil.

Organisation: Vivo Energy (Shell) Duty Station: Kampala, Uganda . About US: Vivo Energy is the company behind the Shell brand in Africa and is jointly owned by Vitol, Helios Investment Partners and Shell. Vivo Energy plc, commonly referred to as Vivo Energy, is a downstream petroleum company with its headquarters in the Kingdom of the Netherlands.
