What factors affect the cost of a 5kw Solar System?

Apart from the location, there are more factors affecting the 5KW solar system cost, such as solar panels, charge controllers, and inverters. Solar panels come in different sizes, types, and shapes, and these factors can affect the cost of the solar system. Among them, the type of solar panels plays an important role.

Is a 5kw Solar System a good option?

A 5kW solar system could be a great option for reducing your energy bill and decreasing your carbon footprint. A 5kW solar system can produce roughly 7,300 kWh of energy annually. If a family consumes the national average of electricity, the 5 kW system would cover about 69% of the total electricity needs.
