

Address of scrapped photovoltaic panel manufacturers

Where can I recycle solar panels in the UK?

There already exist several solar panel recycling companies in the UK including H&H Pro, ILM Highland, and Recycle Solar Technologies. Furthermore, around 70% of Europe's solar manufacturers are part of the worldwide PV Cycle Network.

What is a solar panel recycling service?

Our solar panel recycling service is designed to support businesses in responsibly managing their end-of-life solar panels. This can then align with environmental goals and producer compliance schemes. Whether you are a solar panel installer, manufacturer or construction business, we can help dispose of your solar energy waste safely.

Who is Recycle Solar Technologies Limited?

Recycle Solar Technologies Limited provides recycling services for Solar PV Panels, solar PV inverters & other energy products to benefit the UK & Ireland.

How much does solar panel recycling cost?

Domestic solar panel recycling is completely free, all you need to do is contact your installer and they'll do the rest. If you're a business who wants to recycle your solar panels, there will likely be a charge. The cost of this will depend on the amount of solar panels you have, the type and the logistics.

Where do solar panels go if my installer goes out of business?

It's most likely they'll take your panels to a Designated Collection Facility (check the DFC database to find one near you) before the panels go on to a recycling point. If your installer has gone out of business, you can arrange for your solar panels to be taken to one of these centres - again, free of charge, through a service like PV Cycle.

Do solar panels have a producer compliance scheme?

Every solar panel company (importer or manufacturer) in the UK must also be part of a Producer Compliance Scheme (PCS), such as the government-approved PV Cycle. This ensures that all solar panels are collected and recycled properly. So, get on the phone to your solar panel installer - they'll know what to do.

Founded in 2008, Auxin Solar is an American manufacturing company that focuses on solar panels, solar mounting rack systems, and a system developer of solar power plants. Additionally, Auxin Solar also has ...
