

Is solar energy a good option for Malta?

Firstly, solar power is a clean and renewable source, which means it does not produce harmful greenhouse gas emissions like fossil fuels do. By transitioning to solar energy, Malta can significantly reduce its carbon footprint and contribute to global efforts to combat climate change.

What are the new grant schemes for solar energy in Malta?

The government of Malta launched six new grant schemes to incentivise the production, storage and use of renewable energy as part of the EUR9 million investment. The aid for solar energy will accommodate households with already existing systems to utilise battery powered systems and help new families setup the installation of new solar panel systems.

Is solar energy a good option for Malta's energy diversification?

Solar energy offers numerous benefits that make it an attractive option for Malta's energy diversification. Firstly, solar power is a clean and renewable source, which means it does not produce harmful greenhouse gas emissions like fossil fuels do.
