

Antarctica shenzhen cubenergy co ltd

Who is cubenergy?

Cubenergy is product-oriented and targets to approach the best performance and investment return for Battery Energy Storage System (BESS). We partner with our customers to deliver safer, more resilient, and sustainable energy assets. Innovation for a care-free and plug & play Energy Storage System

Where is cubenergy located?

2F,Building 2,Tongchan New Materials Industrial Park,No. 28,Langshan Road,Nanshan District ,Shenzhen ,ChinaCubenergy has been developing quickly,till end of 2022,accumulatively,the company has manufactured 620MWh BESS and battery strings.

Where is cubenergy based?

Headquartered in Shenzhen,China,Cubenergy was established in Oct. 2015,and its first BESS was commissioned in Jan. 2017. Cubenery built up its BESS factory in Dongguan,Guangdong,with the annual production capacity of 2 GWh,2 R&D centers in Chengdu and Shenzhen,7 sales offices globally.

How does cubenergy ensure Bess safety?

Cubenergy has adopted a vertically integrated approachto ensure BESS safety. This encompasses the entire project cycle: product design,manufacturing,testing,quality control,delivery,operation,and maintenance.

Why should you choose cubenergy?

Cubenergy incorporates talents from electrochemistry, power electronics, relay protection, HVAC, fire protection, electrical, mechanical, software and information technology to design products that stand the test of different regions and times. We prioritize safety. We offer the lowest TCO and give you the highest ROI.

Shenzhen Cubenergy Co., Ltd. (hereinafter referred to as "Cubenergy") is a young while leading manufacturer of C& I scale stationary Battery Energy Storage System (BESS). It is an innovative energy solution provider, integrating BESS with Grid, PV system, Diesel Generator with self-developed BMS and cloud-based EMS, WeWatt(TM), forming a ...

FlexCombo is a reliable, intelligent, and fully integrated BESS that can be applied in a wide range of conditions and locations. Its modular design and parallel string structure indicate more flexibility and effortless experience by reducing shipping difficulties, transporting in all kinds of circumstances, increasing the variety of installation attempts, and simplifying the service ...

Overseas Sales Manager #energy storage # ESS #renewable energy # green energy#ESS manufacturer#· Cubenergy provides all-in-one containerized energy storage solutions. We have helped clients in a wide range of different application needs globally, including peaking shaving, FCR, FFR, energy storage for C& I.

We grow by giving full support to customers and ...

To reach the nominal AC outlet voltage, efficiency will be reduced, corresponding to a reduction in the AC output power of the inverter. Only through balancing, optimization, stringing and all kinds of protective design, complemented with proper regular maintenance, can the output meet expectations to the largest extent possible.

ShenZhen Cubenergy Co ., Ltd. Energy storage is a multidisciplinary professional system. Cubenergy incorporates talents from electrochemistry, power electronics, relay protection, HVAC, fire protection, electrical, mechanical, software and information technology to design products that stand the test of different regions and times.

Cubenergy PowerCombo is specifically designed for utility and Microgrid applications. Thanks to the deep understanding of utility and microgrid markets, Cubenergy innovated all-inclusive and string-structure BESS which significantly improves the system reliability and dramatically reduces the on-site labor cost on installation, commissioning, and system calibration during operation ...

WeWatt Operation Platform is a real-time data monitoring and status alarming platform developed by Cubenergy. WeWatt is designed to provide life circle management services to BESS, enabling clients to experience easy and intelligent O& M experience. Meanwhile, with 24*7 monitoring and controlling, WeWatt can enhance system safety and improve ...

SPAC BMS technology is developed by Cubenergy, has been through five times of iteration since 2016, provides strong battery management ability to actively eliminate the imbalance between battery cells in operation, further guaranteeing the overall availability of BESS in multiple circles while ensuring high safety.
