

Batterij systeem Bouvet Island

A French sailor named Bouvet discovered the island in 1739. And then he promptly lost it -- he misplotted the island on his charts. So when others tried to find it, all they came up with were icebergs and choppy seas. The island was rediscovered in ...

Bouvet Island has legendary status among ham radio enthusiasts. One of the ultimate achievements is to record worldwide contacts from this extreme location. The first to achieve this aim was Gus Browning in 1962, and the best-known ham operator here was Chuck Brady, who worked at a research station from December to early March in 2000/2001.

Bouvet Island was discovered in 1739 by the French navigator Jean-Baptiste-Charles Bouvet de Lozier (1705-86), for whom it is named. It was rediscovered by a German expedition in 1898, and Norwegian expeditions to the Antarctic ...

At that point, the island was given its current name of Bouvet Island ("Bouvetøya" in Norwegian). [6] In 1930, following resolution of a dispute with the United Kingdom over claiming rights, it was declared a Norwegian dependency.
