

Can I install solar panels myself in Belgium?

There are several companies active in Belgium that install solar panels. There are no conditions specifically for the installation of solar panels, so it is possible to install the solar panels yourself. However, it is advisable to have these works carried out by a recognized technician who can also carry out an inspection immediately.

How much subsidy can I get for solar panels in Flanders?

Currently the maximum amount of subsidies you can receive for the instalment of solar panels in Flanders is EUR750. In 2024 the maximum subsidy will decrease to EUR375. The subsidy amount is always limited to 40% of the total investment costs including VAT, as stated on the invoices. What Is The Yield Of Solar Panels In Belgium?

Will Belgium allow plug-in solar panels & batteries to connect to the grid?

Belgium will allow plug-in solar panels and batteries to connect to the grid starting May 2025, marking a major shift in energy use. This new rule will enable more households to easily integrate solar energy with mobile, plug-and-play devices. Belgium is on the verge of a significant shift in its energy landscape.

Does Belgium have solar power?

According to Energie Commune, Belgium's operating solar capacity has increased each year since 2020, with annual solar production increasing by 23% year-on-year between 2017 and 2018, 20.7% between 2019 and 2020, and a record-breaking 37.1% between 2022 and 2023.
