Setting up a wind turbine and solar panel combination is very similar to setting up either system on its own, but with one major exception: your charge control board. Unless you purchase a wind and solar hybrid kit, which already includes a compatible controller, you need to look carefully at the charge control unit to make sure it can be used ...

This hybrid system can take advantage of the complementary nature of solar and wind energy: solar panels produce more electricity during sunny days when the wind might not be blowing, and wind turbines can generate electricity at night or during cloudy days when solar panels are less effective.

Aptech Africa recently designed, supplied, installed and commissioned a hybrid solar system for an office in Burundi. The system is composed of roof mounted 40kWp of solar panes and 80kWh of lithium-ion batteries. The system is hybrid integrated with the country's main grid and a generator for back up.

What Is a Hybrid Solar System? As the name suggests, a hybrid solar system is a solar system that combines
