While the benefits and value that solar offers often outweigh the cost, it"s important to understand the breakdown. Depending on where in Canada you live, the price of a solar power system will vary. What won"t vary, however, are the benefits offered by going solar.

Today, a good way of estimating the cost of installing solar panels on your roof is to assume roughly $3 per watt. With an average Canadian home requiring between 5 and 10 kW of solar panels, this would work out to $15,000 for a 5 kW system. It should be noted, however, that the price per watt is inversely proportional to the cost of the system.
