

# Canada on grid inverter 3 phase

What is a grid-tied string inverter?

Canadian Solar's grid-tied, transformer-less string inverters help to accelerate the use of three-phase string architecture for commercial rooftop and small ground-mount applications. An NRTL approved, cost-effective alternative to central inverters,

What is a 3 phase grid-tied inverter?

3 phase grid-tied inverter for residential or small commercial rooftop application. fanless design, compact and easy for installation. LED+APP, for easy local maintenance. Power rating up to 100.000W, reduce initial investment. Remote service available on Growatt portal. Maximum efficiency of 99%. 7 MPPTs, 12 strings, adapt to complex situation.

What is a Canadian Solar inverter?

Canadian Solar's grid-tied, transformer-less string inverters help to accelerate the use of three-phase string architecture for commercial rooftop and small ground-mount applications.

What are NRTL approved inverters?

An NRTL approved, cost-effective alternative to central inverters, these inverters are modular design building blocks that provide high yield and enable significant BoS cost savings. They provide up to 98.6% conversion efficiency, a wide operating range of 200-800 Vdc, and four MPPTs for maximum energy harvest.

What is an NRTL approved mlpe inverter?

An NRTL approved, cost-effective alternative to MLPE, these inverters are modular design building blocks that provide high yield and enable significant BoS cost savings. They provide up to 98.7% conversion efficiency, a wide operating range of 160-850 V DC, and two MPPTs for maximum energy harvest.

What is a modular inverter?

these inverters are modular design building blocks that provide high yield and enable significant BoS cost savings. They provide up to 98.6% conversion efficiency, a wide operating range of 200-800 Vdc, and four MPPTs for maximum energy harvest. \*For detailed information, please refer to the Installation Manual.

CSI Solar's grid-tied, transformer-less string inverters help to accelerate the use of three-phase string architecture for medium ground-mount applications. An NRTL approved, cost-effective alternative to central inverters, these inverters...
