Cayman Islands U.S. Department of Energy Energy Snapshot Installed Capacity 172 MW RE Installed Capacity Share 6.5% Peak Demand (2019) 113.5 MW Total Generation (2019) 678.8 GWh Transmission and Distribution Losses 5.4% Electricity Access 100% Average Electricity Rates (USD/kWh)

Energy recovery and recycling for the Cayman Islands . ReGen is the infrastructure developed to support the implementation of the Cayman Islands Government's National Solid Waste Management Strategy. It includes waste reduction, reuse, recycling and energy recovery with a focus on sustainability and environmental performance.

On 16 April 2024, Cabinet approved the updated National Energy Policy 2024-2045 and the accompanying Implementation and Monitoring Plan. This is the first update to the National Energy Policy since its initial approval by the Cayman Islands Government in 2017.

The updated National Energy Policy focuses on renewable energy, energy conservation methods and the promotion of energy efficiency. In light of the recently released Climate Change Risk Assessment for the Cayman Islands, this policy update includes new policies for energy resiliency to protect against
