We use blockchain technology to digitalize the community solar farm that allows us to sell shares of the Community Solar Power Plant to members of the local community. This is the first program of its kind designed to redistribute the profits back to the people where each solar project is located by crowdselling shares of ownership for each ...

The Grand Island Solar is a community solar farm located near the town of Grand Island, NY. The 2 MWac community solar farm delivers renewable energy directly into the grid and provides lower cost energy for the local community. Get a \$75 gift card when you sign up to the Grand Island Community Solar Farm! ...

Community solar allows homeowners and renters the option to buy a portion of a solar farm without installing solar at their home. Community solar arrays, sometimes referred to as a solar farm or solar garden, are centralized utility solar facilities with individual panels available for purchase by consumers, who then receive credits on their ...

The agreement will allow Pivot to develop around 150 solar projects in 100 communities across 20 states including Colorado, Delaware, Illinois, Maryland, Ohio and Pennsylvania. The Renewable Energy Credits ...

We use blockchain technology to digitalize the community solar farm that allows us to sell shares of the Community Solar Power Plant to members of the local community. This is the first ...

Join our community solar Initiative in Gary, Indiana. If you're a landowner in Gary, Indiana, and want to host a community solar farm, fill out the application form to get started plete every ...

Community Solar is a way for PSE electric customers to share the benefits of 100% local solar power. By subscribing to shares of a local solar array of your choice, you can replace some, or all, of your regular electricity use with renewable solar energy and help drive a clean energy supply that wouldn't be possible without support from subscribers.
