Energy Industry that provides the most complete range of energy efficiency solutions and services through our passion and values. MISSION.

Fugro collaborates with the Government of Curaçao to map the seabed for floating offshore wind farms, as part of the island's vision to become a leading producer and exporter of green energy. The survey work by Fugro aims to accelerate Curaçao's transition to renewable energy, strengthen its economy, and position it as a potential supplier of ...

The Curaçao Government's target is to realise 6GW in renewable energy capacity by 2035, which is more than the domestic need for energy, ultimately enabling the production and export of green hydrogen. This development is a hugely important step for Curaçao in its efforts to accelerate the transition to green energy and strengthen its economy.

The team of experts, the Floating Wind and Hydrogen working group, and Her Excellency Governor Lucille George-Wout are committed to driving the development of hydrogen production in Curaçao ...

The Caribbean island of Curaçao has enlisted the help of Dutch ocean technology giant Fugro to help it become a regional leader in the production and export of green energy. The Government of Curaçao has asked Fugro to map the seabed of the island's surrounding waters for future development of floating offshore wind farms.

On May 24th, they signed an agreement to prepare for the production of offshore floating wind energy to realize the establishment of a hydrogen production value chain in Curaçao. This agreement offers significant growth and innovation opportunities for the governments, industries and knowledge partners involved in both countries.
