Solutions. onsemi's silicon carbide (SiC) and innovative packaging technologies are the gateway to improved density, reducing system losses and simplifying cooling thus improving overall system reliability across a wide range of mission critical UPS systems. Our system expertise has been encapsulated into an array of optimized power modules supporting all key power stage ...

In standard system designs, electric motors are intended to operate at a fixed speed. This speed is determined by the frequency of the power supply and the motor design (number of poles). The shaft load on the motor is determined by the product of shaft speed and torque. With a fixed speed, motor power is determined by the torque of the load.
