

Does Montenegro have an energy efficient home?

In 2023, the project Energy Efficient Home continued to support households to purchase heat pumps with interest-free loans. Montenegro is still finalizing its draft NECP, which must harmonize the 2030 energy efficiency targets with the 2030 targets set by the Energy Community.

Which energy projects have been subjected to an EIA in Montenegro?

Montenegro has not provided a list of energy projects that underwent screening and were subjected to an EIA. The development of the EIA, which should include an appropriate assessment for the Komarnica hydropower project, located within a candidate Emerald Site and the Dragi?nica and Komarnica Nature Park, was delayed.

Will UGT renewables provide green energy solutions in Montenegro and the Balkans?

He expressed confidence that it would provide green energy solutions in Montenegro and the Balkans together with UGT Renewables. The proposed project will be supported by the US and South Korean governments, Park added.

Does Montenegro have a national energy and climate plan?

Montenegro is still finalizing its draft National Energy and Climate Plan (NECP). Montenegro has not defined the 2030 climate target in its national legislation, nor in the draft NECP. It should align with the 2030 targets set by the Energy Community. There is a legal basis for the national inventory system.

Does Montenegro have a gas network?

No gas network exists in Montenegro. Montenegro's only applicable model for the unbundling of a future gas transmission system operator is the ownership unbundling model. Montenegro bonus has been designated by the Government for that purpose, with no actions in that regard for years.

Will Podgorica help Montenegro transition to a greener energy base?

At the ceremony in the country's capital Podgorica, the United States-based company's Chief Executive Officer Adam Cortese said it would aid Montenegro in a swift and efficient transition to a cleaner, greener energy generation base.

However, exclusion of the Aluminum Plant Podgorica from the indicative energy savings target does not mean that it will be excluded from the obligation to achieve energy savings, because the Law on Energy Efficiency provides for all big consumers, including the Aluminum Plant Podgorica, certain obligations related to implementation of energy
