

ABB Power Grids' power transformers will contribute to the integration of this sustainable electricity into the grid across nine of Mainstream's Chilean projects using digitally enabled transformers, to enhance their operation in this critical application.

Together with our partners, here in Patagonia, Chile, we have built the world's first integrated, industrial-scale plant for synthetic climate-neutral fuels. Step-by-step, our team will continue to explore the future of eFuels from wind and water.

From design and engineering, energy management systems integration, commissioning, and long-term service programs, the Prevalon Battery Energy Storage Platform meets the demands of your energy system today and into the future.

Copenhagen Infrastructure Partners (CIP) announced today that it has taken a final investment decision (FID) on a 220-MW/1,100-MWh battery energy storage system (BESS) in northern Chile, its first in the country, and is set to start construction works on the project.

The company works with its customers and partners on energy systems for the future, thus supporting the transition to a more sustainable world. With its portfolio of products, solutions and services, Siemens Energy covers almost the entire energy value chain - from power generation and transmission to storage.

BESS are being added to solar PV projects in Chile in order to reduce curtailment and negative prices due to over-production, while standalone projects are being built to capitalise on energy market volatility.

Innergex Chile wanted to provide PV Salvador with energy storage capabilities by integrating a Battery Energy Storage System (BESS). This would be Innergex's first BESS project in Chile and one of the first such projects in the entire country.

CLOU Electronics, the world's leading ESS system integrator, has recently announced the signing of an agreement with GEA TRANSMISORA SpA, a subsidiary of Transelec S.A., Chile's leading high-voltage transmission system provider with over 80 ...
