

# Eritrea best solar panel kit for campervan

What are RV solar panel kits?

RV solar panel kits bundle the major components that you need to install a solar electrical system on your campervan or RV. For our purposes, we'll break these kits down into three categories: basic solar panel kits, complete solar panel kits, and plug-and-play systems.

What are the best campervan solar panels?

BougeRV's 9BB panels are our current top picks for best campervan solar panels. Their other components are high quality as well, and they continue to release new innovative products for the RV and van life markets. This BougeRV solar panel kit is a solid choice for your rig.

What are the best RV solar power kits?

The rigid mono RV solar power kits from Rich Solar is another solid option that bundles high-quality components at a good price. These kits include 9BB mono solar panels, wiring, mounting brackets, an inline MC4 fuse, and an MPPT charge controller (20A, 40A, or 60A, depending on kit size).

Are RV solar panels a good choice?

The RV solar panels themselves are the cornerstone of any solar panel kit. Most kits come bundled with rigid solar panels, but if you prefer flexible solar panels you have some options. Rigid solar panels are much cheaper, far more durable, and last longer (20-25 years).

Do you need a solar power kit for a campervan?

Solar power kits for RVs include the big stuff, but they don't include everything. You'll still need to source additional wiring, fuse blocks, inline fuses, bus bars, and outlets. And unless you get a complete kit, you may even have to pick out a campervan battery and 12V power inverter.

What is included in a camper van Solar System kit?

Included in the kit is a 160W solar panel, charge controller, corner mounts, bonding agent, cable entry gland, 5m of 4mm rubber cable, in-line blade fuse holder and fuse, all connectors and instructions. The only additional items needed to get a 12v solar system up and running in your camper van is a battery and solar regulator.

Calculating power use - an example. Power (Watts) = Current (Amps or A) x Voltage (Volts or V) Your battery produces roughly 12 Volts, so to work out how much your appliances drain the battery, use the appliances' power rating, i.e. Watts / 12. For example, an IE A Waeco CR50 Fridge has a power rating of 40 Watts, so:  $40W / 12 = 3.33A$
