

Will Egypt reach 42% of its electricity mix by 2030?

Our Standards: The Thomson Reuters Trust Principles. Egypt is still aiming for renewable energy to reach 42% of its electricity generation mix by 2030, but that goal will be at risk without more international support. Prime Minister Mostafa Madbouly told the COP29 conference on Tuesday.

What is Egypt's target share for renewables by 2040?

Shortly afterwards, however, Egypt's petroleum ministry said the target share for renewables was 40% by 2040, with the country maintaining a major reliance on natural gas.

Will Egypt become a net exporter of gas in 2025?

Since taking office in July, Badawi has met numerous international energy companies, including Italy's Eni, which plans to start drilling new wells in Egypt's largest gas field, Zohr, in early 2025 to boost production. Zohr's gas production peaked at 3.2 billion cubic feet per day (bcf/d) in 2019, enabling the country to become a net exporter.

Does Egypt have solar power?

Solar power Egypt enjoys an abundance of solar radiation. According to the solar atlas, Egypt receives an average of 3,050 h of sunlight per year, having direct normal irradiances fluctuating from 1970 to 3200 kWh/m² yearly and annualized total solar irradiance ranging from 2000 to 3200 kWh/m².

Does Egypt need natural gas?

The country has in recent years relied heavily on natural gas, which it defended during the United Nations COP27 conference in 2022 as a "transitional fuel" at a time when it was a net exporter of gas. But last year, Egypt faced prolonged power outages as natural gas production was hit by financial constraints and declining local extraction.

Does Egypt have a wind energy supply?

Egypt is endowed with a plethora of inexhaustible wind energy supply, specifically in the region of the Sinai Peninsula and areas surrounding the Gulf of Suez.
