

Export tax rebate for energy storage system

What is the energy storage rebate program?

The program was started in 2018, as a response to the need for energy storage systems in fire-prone areas where utility companies frequently shut off power. The program currently offers rebates of between \$150 and \$1,000 per kilowatt-hour of storage.

What is export tax rebate?

Export tax rebate is actually export exemption and tax rebate. Due to the indirect calculation tax law of value-added tax, that is, the usual tax payable = output input, in practice, the output is exempted, the input is refunded, and the tax refund is obtained.

What is export tax rebate (ETR)?

The provision of "export tax rebate (ETR)" refers to refunding the value-added, business, and special consumption taxes paid on export goods to encourage a nation's export trade (Mah, 2007). ETR is an important subsidy instrument that leverages exports and plays a vital role in Chinese foreign trade (Chen et al., 2006, Elena, 2004).

Do energy suppliers have to pay for electricity exported to the grid?

For example, your battery could store electricity from the grid before exporting it later. Energy suppliers don't have to pay you for non-renewable electricity exported to the grid, but some may choose to do so. Some suppliers may only pay the SEG for the electricity your low-carbon system generates itself.
