Who owns the energy company in Denmark?

Furthermore, it is owned by the Danish Ministry of Climate, Energy as well as Utilities. The company owns, operates as well as develops the transmission systems of electricity and natural gas in Denmark. Its main purpose is to contribute to the development of a climate-neutral energy supply.

Fervo Energy is an energy resource company focused on harnessing heat through enhanced geothermal systems (EGS). It was co-founded in 2017 by Tim Latimer, a mechanical engineer who worked as a drilling engineer at BHP until 2015. His departure from the oil and gas sector was driven by a desire to apply techniques observed during the shale revolution to geothermal extraction.

We are a world-leading multidisciplinary team of experts in geothermal energy, renewable power development, and oil and gas technology. We are reservoir engineers, geologists, geophysicists, engineers, and renewable power developers who are passionate about building energy systems designed to address climate change.

Clean energy has become a Danish passion and almost 50 percent of all energy used in this country comes from renewable sources. It is also one of the world-leading countries when it comes to wind energy production. Top renewable energy companies in Denmark have played a huge role in generating such an amount of wind energy.
