

What is Finland's Energy Policy?

Finland's approach includes nuclear energy, more renewables for electricity and heat, improved energy efficiency, and economy-wide electrification. After Russia's 2022 invasion of Ukraine, Finland moved to cut Russian energy imports, which previously comprised 81% of crude oil, 75% of natural gas, and 19% of electricity imports in 2021.

How did Finland's energy mix change from 2011 to 2021?

From 2011 to 2021, Finland experienced a significant shift in its energy mix. The share of fossil fuels in Total Energy Supply (TES) declined from 53% to 36%, with decreases seen across all types: oil (26% to 21%), natural gas (9.6% to 6.4%), and coal (11% to 6.3%). Peat's contribution to TES also decreased from 5.8% to 2.7%.

What is Finland's energy supply in 2021?

In 2021, Finland's Total Energy Supply (TES) comprised bioenergy and waste (33.6%), oil (20.8%), nuclear (18.5%), coal (6.3%), natural gas (6.4%), electricity imports (4.6%), hydro (4.1%), peat (2.7%), wind (2.2%), and heat (0.6%).

Why is energy consumption so high in Finland?

Energy consumption per capita in Finland is the highest in EU. Reasons for this include energy-intensive industry, a high standard of living, a cold climate and long distances. Rise of energy consumption stopped in the 21st century, mainly due to changes of industry. There is now less heavy industry and the energy efficiency has improved.

What is Finland's Energy and Climate Strategy?

Finland's energy and climate strategy targets carbon neutrality by 2035, emphasizing energy security, sustainability, and biodiversity.

What are Finland's energy subsidies?

The public energy subsidies in Finland in 2013 were EUR700 million for fossil energy and EUR60 million for renewable energy (mainly wood and wind). An increased feed-in tariff was used for new wind power industry in 2011 to 2015.

Swire Renewable Energy will be exhibiting at the upcoming Windaba 2024 Conference & Exhibition, taking place on 2-3 October at the Cape Town International Convention Centre, South Africa. My career with Swire Energy Services began June 2009, and I have been fortunate to climb up through the ladder within the Operations department. I started as a Maintenance Operative and worked for two years in that role. With the support of SES, I got the requisite training to become a certified NDT/lifting Inspector.

OverviewEnergy and climate goalsConsumptionEnergy sourcesEnvironmental effectsExternal linksThe objective of RE (2005) of electricity was 35% (1997-2010). However, (2006) the Finnish objective was dropped to 31.5% (1997-2010). According to "Renewables Global Status Report" Finland aims to increase RE only 2% in 13 years. This objective to add the RE use with 2% in 13 years is among the modest of all the EU countries. The public energy subsidies in Finland in 2013 were EUR700 million for fossil energy and EUR60 millio...
