

The HV2600 is high-performance,scalable battery storage modules. The modular design allows for maximum flexibility,making them suitable for a broad range of storage applications. Additional batteries can be installed in series,allowing for a maximum storage capacity of 20.48kWh.

I.T.S. Technologies is a supplier of an extensive range of renewable & energy saving technologies. To order online Fox ESS HV2600, Enter our site.

As we know the HV2600 battery is being updated to include a new comms chip (due to chip shortages) which means that a BMS upgrade is required to use V2 batteries going forward. FoxESS are running an RMA process to replace free of charge any customers who have a V1 BMS or HV2600 and now require a V2 BMS due to adding extra V2 HV2600's.

Normally HV2600 are around 53volts. 20 voltages sounds like permanent damage has occurred. I assume you have the BMS connected to an inverter right? then you set the dip switches to the correct dip position,turn on the main MCB breaker and then press the silver power button on the BMS. Then I would tell your inverter to do a force charge asap.

FoxESS are running an RMA process to replace free to charge any customers who have a V1 BMS or HV2600 and now require a V2 BMS due to adding extra V2 HV2600's. Has anyone yet received a V2 BMS or V2 HV2600? If so please post a picture of the front of the unit so we can add it to the knowledgebase.

I have an AIO system with 7 HV2600 batteries attached, and all works well. I would however be happy to add a further 4 batteries were that possible. It seems that 7/8 is the maximum number that can be utilised with the AIO, but I see other members of the forum far exceed this - Will for example has 26 batteries.

FOX ESS HV2600 2,56kWh hoogspanningsbatterij De FOX ESS HV2600 2,56kWh hoogspanningsbatterij moet worden gekoppeld aan de FOX ESS AiO systemen.
