What is GCL energy storage?

GCL provides photovoltaic energy storage products, covering energy storage products used in residential, C&I, utility and other industries.

What does GCL do?

GCL targets at making PV-generated electricity affordable and inclusive for the public by its constant technology innovations in polysilicon, silicon wafers, cells, modules, system integration and photovoltaic power plants, continuous improvement of its management, regional layout and green energy certification systems.

What is GCL's green energy strategy?

In compliance with the nation's call for "a systematical development of solar energy, silicon energy, hydrogen energy and renewable energy", GCL vigorously promotes the green energy business under its strategy triad of "Technology GCL, Digital GCL, Green GCL".

What is a GCL module?

A GCL module is a residential solar power solution from GCL, best suited for homes. The G-Home Solar Kit from GCL includes energy storage and home energy management systems (HEMS), enabling homeowners to store solar energy throughout the night.

Who is GCL new energy?

GCL New Energy has provincial branches all over the country, with 157 photovoltaic power plants operating in 26 provinces and cities, and we continue to expand our coverage of the green energy market territory. Our development team has extensive experience and over 400 members.

Why should I choose a GCL modular system?

GCL's modular system is versatile and best suited for all kinds of applications, including residential use. The G-Home Solar Kit is a perfect power plan for your home that combines energy storage and home energy management systems (HEMS), allowing home owners to store solar energy throughout the night.
