

SKELEC, St. Kitts electricity utility, is able to make the transition from diesel to renewables in part thanks to cutting-edge technologies. The combined Solar+Storage system features advanced inverters and the Leclanché EMS to smooth out fluctuations and manage the stability of the grid. The Solar+ Storage system will provide St. Kitts with a ...

The solar PV will supply St. Kitts with 30 - 35% of the annual electricity demand utilising sustainable, solar energy with zero emissions. The solar and storage system will replace over 4,000,000 gallons of diesel per year.

St Kitts has installed capacity of 43 mW and Nevis 13.4 mW but government has plans for a further 70 mW. The airport has a 1 mW solar farm and the government estimate a potential 16mW of solar power at a rate of 5 kWhrs per m2 over the whole island.

AIMS Power inverters are a must for mobile, off-grid and/or backup electricity in St. Kitts and Nevis. The electrical grids of St. Kitts and Nevis operate at 120 Vac 60 Hz and go down frequently, leaving residents of the area without electricity often. AIMS Power provides products to help residents of St. Kitts and Nevis achieve energy ...

A New Era In Power Generation was officially established In St. Kitts and Nevis on 27th February, 2014, gear towards the transition from fossil fuels to renewable energy products with main ...

A New Era In Power Generation was officially established In St. Kitts and Nevis on 27th February, 2014, gear towards the transition from fossil fuels to renewable energy products with main focus on Photovoltaics and Wind powered solutions, with hopes to gradually expands to other renewable energy technologies.

Gabinete para inversor solar St Kitts and Nevis

The International Renewable Energy Agency (IRENA) is developing a solar simulator for St. Kitts and Nevis. This is a web-based software tool developed by IRENA to support homeowners, businesses, and governments in evaluating the prospects for electricity generation using rooftop-mounted solar photovoltaic (PV) systems.

Let Solar Island Energy help your Saint Kitts and Nevis business save significantly on energy bills, have reliable, self-contained utilities, improve its long-term value, and be less dependent on fossil fuels. We provide a free consultation to assess how you can benefit from solar panel installation and renewable energy solutions. Contact us today.
