

In Guadeloupe, more than 13,000 m<sup>2</sup> of solar panels have been placed on the rooftops of the Destreland shopping centre and Carrefour Grand Camp. A fifth installation of around 2,300 m<sup>2</sup> on the roof of Mr Bricolage Abymes will be in operation by the end of 2019.

Okapi provides energy-saving simulations for your customers, allowing them to visualize the potential cost savings of their solar investment. Asset Management Okapi provides a centralized system to help installers manage assets more effectively, ensuring streamlined operations and enhanced efficiency.

The following types of renewable energy are utilized in Guadeloupe: solar energy, wind energy, water energy, biogas, combined energy sources as well as geothermal energy. Attention is drawn to a specific geographic setting as well as the social and economic situation which influence the demand for energy in this department of France.

Ensure non-disruptive, coordinated, and managed development of solar photovoltaics that achieves a balance between sub-sectors of renewable energy and across Guadeloupe; Manage the development of the sector by selecting the solar photovoltaic projects that are the most beneficial for Guadeloupe
