This high-profile, Government of Guam project, was funded by the Federal Aviation Administration. Guam International Airport Runway Rehabilitation SSFM team of local island experts with extensive experience in airport construction provided Project & Construction Management Services for the longest runway at Guam's only civilian airport.

SSFM was responsible for preparing construction contract documents for sidewalks, crosswalks, traffic circles, roundabouts, solar powered speed radar signs, flashing beacons, speed humps, speed tables and skid resistance surfacing. The 5 stage project included: Stage 1 - Schematic design for concepts and schematic plans;

Guam International Airport Authority Runway Rehabilitation Project. 6L-24R is 150 ft. wide with 35 ft. shoulders and 12,015 ft. long. It is the primary runway for the airport. Approximately 95 percent of all runway operations are conducted on Runway 6L-24R. The project rehabilitates all port and cement concrete (PCC) pavements on Runway 6L-24R.
