

Guernsey backup power solutions

Why did Guernsey Electricity upgrade control systems?

Guernsey Electricity said upgrades to the control systems were part of a multimillion-pound project of planned investment at Vale Power Station. It said it was "making use of the lower demand" of electricity during July and August. Jon Sexton, head of engineering and design, said during summer, low-carbon energy was imported from Europe.

Will Guernsey's new electricity strategy come after a long-term deal?

A leading businessman has criticised Environment and Infrastructure's (E&I) new electricity strategy for Guernsey. Jon Moulton said the strategy should come after a long-term deal on power supply has been signed with French energy suppliers. The current deal for electricity supply with French energy supplier EDF is set to run out in 2027.

What's happening at a Guernsey power station?

A "range of repairs and upgrades" have taken place at a power station. Guernsey Electricity said upgrades to the control systems were part of a multimillion-pound project of planned investment at Vale Power Station. It said it was "making use of the lower demand" of electricity during July and August.

How many photovoltaic panels are there in Guernsey?

There are 310 photovoltaic panels on the roof of the newly reopened Guernsey Rural Occupational Workshop (Grow) site. The charity worked with Guernsey Electricity and The Little Green Energy Company on the scheme. Grow helps people with learning disabilities develop life skills.

Will a second subsea cable meet Guernsey's energy needs?

"The island's total energy needs could be met by a second subsea cable which will provide additional capacity and resilience, but the power station will always remain a back-up function here on-island," Mr Sexton said.
