Backup power options are a hot topic as South Africans look to protect their lifestyles from loadshedding and power outages. While many people have strong opinions about which options are best, finding the right solution for your home and family depends on your specific requirements and budget.

Many standby generator options in the \$2,000 to \$7,000 range can power a standard American home. But the average generator cost, including installation, is \$9,000. By comparison, a 10 kilowatt-hour (kWh) home backup battery costs about \$8,000 after incentives. If you want whole-home power, you'll probably need more storage than that, though.

From facing extreme weather conditions like bushfires and storms to unexpected power outages, a home backup generator is an investment in peace of mind. ... Uninterrupted Power Supply (UPS) The R600 offers an integrated UPS function, a feature often overlooked but essential for protecting sensitive devices like servers and desktop PCs. ...

A UPS (Uninterrupted Power Supply) is a backup battery that keeps the equipment plugged into it running in the event of a power outage. It's not just a glorified power bank, because the UPS detects interruptions in the power and automatically switches the connected devices to running off the UPS battery, so they don't shut down.
