Putting Poland's energy security in the hands of imported LNG is a security threat in itself. Poland's appetite for gas was fueled mainly by worries about power system balancing. However, data from 2023 shows that Poland's electricity system can already manage high renewable shares.

Over 3 million households in Poland continue to heat their homes with "smokers"-- outdated, inefficient, and heavily polluting boilers fueled by solid fuel, notably coal and wood. Fuel combustion from these boilers, for ...

Discover Odin Energy Poland, a premier petroleum and petrochemical refinery located in Poland. According to PEP 2040, energy efficiency is one of three major energy priorities in Poland. A system of white certificates that award energy efficiency, investments, and expansion are an instrument for incentivizing energy efficiency in Poland. This system is required for the consumer utilities selling electricity to the end-user market.
