

# How is the Anwei Grid

How does the grid format work?

The grid format displays question numbers (eg 1-6) down one vertical side, and the possible answer options (eg A-D) across the top. Students distribute four marks for each question across the answer options in a strategic way to gain the best possible score. There is only one correct answer for each question.

How do you read a multiple choice answer grid?

The multiple choice answer grid is read by computer, so it is important that you read the instructions carefully. Read the questions carefully. Try to eliminate wrong answers to reduce the choice. If you are unsure about an answer then put a star by the question and move on - make sure you come back to it. Answer all questions.

How do I mark the answer grid?

To mark the answer grid, place the acetate over the answer sheet and points awarded to correct answers remain visible. Copy the points in any visible boxes into an additional column. Add the points in this column to give the final score. Students are unaware they are providing self-assessment data as they focus on maximising their score.

What is MCQ grid format?

Multiple-choice questions (MCQs) in a grid format for students to enter their answers can motivate students to self-assess correctly, and to perform better. The grid format displays question numbers (eg 1-6) down one vertical side, and the possible answer options (eg A-D) across the top.

What is the answer-grid MCQ?

The answer-grid MCQ combines performance assessment, feedback, confidence estimates and incentives for students to perform into one easily administered tool. It is simple to use and allows self-assessment of knowledge and confidence, and immediate feedback on individual questions. Download a blank version of the self-assessment grid (word or pdf)
