

# How many bottles of fruit can be placed in the locker

How much fruit can a litre jar hold?

For rough canning estimations, one pound (lb) was roughly assumed to be 500 g. As a very rough rule of thumb in metric, you can assume that a 1 litre jar will hold roughly 1 kg of fruit. Source: National Center for Home Food Preservation Self-Study Course and So Easy to Preserve, 2014 edition, page 12. bu. = bushel qt = US quart lb = pound

What fruits can be bottled?

Almost any type of fruit can be bottled, although some types lend themselves to particular methods of preserving. Blueberries, raspberries, blackberries, currants and gooseberries all make excellent jams and jellies. Apples and pears make good chutneys and most fruits can be pickled.

How do you store fruit?

If you want to store your fruit, you need to keep it in a cool, dark, well-ventilated place, such as a cellar, garage or garden shed. There needs to be a degree of humidity so the fruit doesn't dry out, but not so much that the fruit goes rotten quickly.

What fruit can be stored in the fridge?

Fruits suitable for storage in the fridge include cane fruit such as blackberries and raspberries, bush fruit such as blackcurrants and blueberries, and small fruit such as grapes and strawberries. These fruits also need a degree of ventilation, and are best stored in paper bags on a slatted shelf.

How many bottles per section?

It is essentially what you would have except mine are free standing. The bottles are stacked directly on top of one another 5 rows of bottles high. The rows alternate 4 bottles then 3 bottles. That's 18 bottles per section. I've had these things for a long time without any issues. All my bottles are 750ml.
