

3 ???· Hammond Power Solutions Inc. (TSE:HPS.A), might not be a large cap stock, but it led the TSX gainers with a relatively large price hike in the past couple of weeks. The recent rally in share ...

Grounding transformers are essential components in electrical installations, particularly in power generation systems such as solar, wind, or traditional generators. They play a critical role in maintaining system reliability and safety by providing "effective" grounding, as defined in Article 100 of the NEC Code, in three-phase three-wire systems.

HPS Sentinel (TM) G general purpose distribution transformers are rated for 600 volts and below. They are generally used for supplying appliance, lighting, heating, motorized machine and power loads from electrical distribution systems.

We project, produce and service switch gear and control systems of highest quality for energy production and distribution. We see ourselves as a reliable partner and offer innovative and individual solutions with maximum safety, based on newest technological standards. Our highly qualified, motivated and flexible staff enable this worldwide.

We are a future-proof company in the power generation and distribution sector. Our values are important to us: Customer orientation - Loyalty to our customers and the target, to find individual and optimal solutions, are supported and animated by all our staff.
