This new service allows users to beam light to their exact location at night using a satellite. Through a live demo, we witness how the app can illuminate specific spots, ...

Reflect Orbital is a company focused on delivering sunlight to Earth after dark using a network of in-space reflectors. They aim to capture and utilize solar energy, which is vastly abundant, to support sustainable energy solutions on Earth.

The European Space Agency (ESA) has long explored space-based solar power as a potential energy solution, theorizing that solar collection in space--where sunlight is over 10 times more intense than on Earth's surface--could eventually meet one-third of ...

Reflect Orbital, a California start-up, plans to extend solar power into the night by reflecting sunlight onto solar farms using a constellation of space mirrors. This innovative approach could provide an extra 30 minutes of sunlight after sunset, potentially transforming solar energy production. Launch of the mirrors is planned for 2025. - TheDailyGuardian

In a world where Stanford startups increasingly churn out iterations of food delivery apps and poorly disguised duplicates of ChatGPT, original thinking and boundless ambition are rare traits. However, these traits are at the core of Reflect Orbital, an energy startup with a mission so audacious it borders on science
