

What is Enpal?

Enpal is a company providing solar panels. It offers personalized solar solutions and installation of photovoltaic systems.

Can enpal take on the world with a solar system?

After a recent EUR215 million Series D funding that places its valuation at EUR2.2 billion, Enpal is poised to take on the world with its solar system offering that allows customers to rent the system from the beginning, without money upfront. It makes solar power more accessible and empowers more of us to transition to this energy source.

Is Hungary embracing solar?

The nation had a record year for solar energy development. Most of last year's new additions - 320 MW - came through a FIT scheme but a further 90 MW was represented by net metered installations. Hungary's cumulative installed PV capacity reached around 700 MW in 2018. Hungary is embracing solar.

What is the potential of solar power in Hungary?

Solar power has unique potential in Hungary, where 1950 - 2150 sunny hours offer the potential for 1,200 kWh/m² per year, greater than numerous other European nations. Other renewable energy solutions, like hydroelectric power, are less viable in the area.

Will enpal reorganise Germany's solar industry?

Advanced talks with leading global manufacturers Sustainable support for the German solar industry to be reorganised Berlin, 28 February 2024 - Enpal, Germany's leading system integrator of renewable energy solutions, is planning a pan-European consortium for the domestic production of solar modules.

How many solar panels are installed in Hungary?

Hungary reached a cumulative installed PV capacity of more than 700 MW last year, according to provisional numbers given to pv magazine by Szolnoki, president of the Hungarian Photovoltaic Industry Association. Szolnoki said 2018 was a record year for solar deployment in the country with 410 MW of new capacity.

Enpal, a German unicorn, runs a one-stop-shop offering an integrated renewable energy solution, consisting of solar- and battery-equipment, electric vehicle chargers, heat pumps and a smart energy manager. As of today, high acquisition costs still prevent many European homeowners from switching to solar energy," said the EIB.
