What is the energy access problem in Mali?

Mali faces a critical energy access challenge. The national power access rate was 50% in 2019 (compared to 36.11% in 2015). The problem is particularly acute in rural areas with 21.12% access rate in 2019 (compared to 15.75% in 2015).

What is the power access rate in Mali?

The national power access rate was 50% in 2019 (compared to 36.11% in 2015). The problem is particularly acute in rural areas with 21.12% access rate in 2019 (compared to 15.75% in 2015). Power generation is limited (Annex A.17), forcing Energie du Mali (EDM, the power utility) to have recourse to frequent load shedding.

How many MW is a power plant in Mali?

The power plant is composed of six (6) medium speed, 15 MW Caterpillar engines. Power Africa has supported the development of 140 megawatts (MW) of electricity generation projects in Mali. In addition, various firms have received U.S. Embassy support to move transactions forward.

How many people in Mali have access to electricity?

In Mali, less than half of the population has access to electricity, whereas in rural areas access is limited to only 16.7% of the population. In terms of modern fuels, access is extremely low, at only 2% and 3% for rural and urban areas, respectively. Energy access is widely recognised as essential to improve economic welfare.

Will Mali sell power to Energie du Mali?

Power will be sold to Mali's national utility Energie du Mali through a 20-year power purchase agreement. The power plant is composed of six (6) medium speed, 15 MW Caterpillar engines. Power Africa has supported the development of 140 megawatts (MW) of electricity generation projects in Mali.

What are the main sources of electricity in Mali?

At present, thermal and large-scale hydropower plants are the main sources of electricity supply on the national grid. Renewable energy could provide the most competitive form of power in Mali due to today's advanced technological reliability, declining technology costs and high resource potential.

On August 11, 2016, Adani Power signed an MoU with Bangladesh Power Development Board to set up a 2x800 MW thermal power plant on build-own-operate (BOO) basis in India. Adani will export the entire power generated from the power project to Bangladesh. The terms of reference was granted in July 2016. An EIA was submitted in April 2017.
