

What does the EU do with India?

Within their partnership, the EU aims to further strengthen its cooperation with India in the field of renewable energy, while supporting its clean energy transition and ambitious climate mitigation targets.

What is the relationship between EU and India?

EU and India have a partnership on clean energy and closely cooperate to support their climate and energy objectives. India is the world's third-largest energy-consuming country. Its energy sector is set to keep growing in the coming decade as the country focuses on domestic energy production, including renewables, nuclear and energy efficiency.

Why should the EU cooperate with India?

The EU is keen on cooperating and coordinating with India at international and multilateral climate and energy fora to meet common objectives. We are both significant importers of energy, large economies and democratic societies.

What is the EU Strategy on relations with India?

The EU strategy on relations with India adopted in November 2018 proposes several concrete activities, aiming at making our energy and climate cooperation even stronger to face global challenges. The European Union attaches the highest importance to the cooperation with India in the area of clean energy and climate action.

What does the European Green Deal mean for India?

With the European Green Deal, Europe has put clean energy and climate action at the top of its domestic and external agenda. The EU is keen on cooperating and coordinating with India in international and multilateral climate and energy fora. We are both significant importers of energy, large economies and democratic societies.

How much FDI does India get from the EU?

EU foreign direct investment (FDI) in India reached EUR87 billion in 2020. Nearly 15% of Indian exports were directed to the EU in 2021. Trade in goods and services between the two amounted to EUR95.5 billion in 2020. 6,000 EU companies operating in India have created 1.7 million direct jobs and an additional 5 million indirect jobs.

Through a Pan-European footprint, EuroEnergy is proud to support stable energy resources while helping to advance the European Union's goals to reduce greenhouse gas emissions 55% by 2030 and become climate neutral by 2050. Caption Title Caption Subtitle ...
