

India safety storage cabinet

What are the safety cabinets design standards?

The safety cabinets design standards are under NFPA 30 Chapter 9.5.3 and OSHA 29 CFR 1910.106 regulations. Chemical storage cabinets are designed and built for the safe storage of acids & corrosive chemicals.

What are chemical storage cabinets?

Chemical storage cabinets are designed and built for the safe storage of acids & corrosive chemicals. The chemical storage cabinets adhere to Kewaunee's rigid quality construction standards, and feature 15 different capacities, three door options, Factory Mutual approval, and diametrically opposed side vents.

Why do you need a safety cabinet?

Safety cabinets provide a convenient and secure means of storage for flammables, corrosives, acids, paints, and ink. Proper segregation of stored chemicals is necessary to prevent incompatible materials from inadvertently coming into contact, in which case fire, explosion, violent reactions, or toxic gases could result.

What are Kewaunee chemical storage cabinets & flammable safety cabinets?

Kewaunee chemical storage cabinets & flammable safety cabinets are specifically designed for the safe storage of chemicals and flammable & combustible liquids. The safety cabinets design standards are under NFPA 30 Chapter 9.5.3 and OSHA 29 CFR 1910.106 regulations.

What are flammable storage cabinets?

Flammable safety cabinets tailored for the storage of flammable and combustible liquids, ensure maximum protection for both personnel and products. The flammable storage cabinets are designed to meet NFPA, OSHA, and FM regulations. Available in a full range of sizes and designs including manual, self-closing, and bi-fold self-closing doors.
