

What does Vena Energy do?

Today,Vena Energy is developing over 19.2 GW of offshore wind projects throughout the APAC region. Energy storage is pivotal in the transition to renewable energy,enabling renewables to replace conventional power sources. As intermittent renewable energy such as solar and wind energy increase,energy storage systems manage fluctuations.

Who is Vena Energy Australia?

Vena Energy Australia is a leading solar energy developer, with assets totalling 95MW in South Australia, and a further 2.5GW currently under development. Vena Energy Australia is focused on expanding our renewable portfolio of both onshore and offshore wind assets.

How much wind energy does Vena Energy have in 2023?

In 2023,Vena Energy contracted an additional 1.6 GW of onshore wind and solar PV projects from our development pipeline,bringing our total contracted capacity to 3.9 GW. Offshore wind technology harnesses wind energy from turbines situated in the open sea or coastal regions.

Where is Vena Energy located?

Vena Energy offers energy storage solutions,including the operation of the Wandoan South Battery Energy Storage System in Queensland and a combined battery and solar PV project in South Australia,with more capacity in development. Where is Vena Energy's headquarters? Vena Energy is located in Singapore,Central Region,Singapore.

Who is Vena Energy Power Resources private limited?

Vena Energy Power Resources Private Limited is a Private Limited Company incorporated on 27 March 2013. It is classified as a Non-govt company and is registered at the Registrar of Companies, Bangalore. Vena Energy Power Resources Private Limited has an authorized share capital of Rs. 100,000,000 and a paid up capital of Rs. 57,662,808. It is involved in the Production, collection and distribution of electricity.

How many investors does Vena Energy have?

Vena Energy has 10 investors including DBS Bank and Credit Agricole CIB. How much funding has Vena Energy raised to date? Vena Energy has raised

We provide green energy and digital solutions to our customers, which are powered by a renewable energy portfolio of Onshore Wind, Solar, and Offshore Wind projects and a green infrastructure pipeline including BESS, Data Centres, and Green Hydrogen and Ammonia.
