

# Is it OK to install photovoltaic panels on the roof of a factory

Can solar panels be installed on a building roof?

Solar energy brings many positives from a climate change perspective, but installing solar PV panels on building rooftops can introduce new risks to the building and occupants. Fires resulting from electrical faults is the most common cause of loss associated with roof mounted solar PV installations.

Do you need planning permission to install solar panels on your roof?

An increasing number of people are investing in solar energy. More and more homes are having solar panels, or solar tiles, installed on their roofs. Of course, with such installations, the topic of planning permission and building regulations often comes to the surface.

Can PV panels be installed on a new roof?

Where PV panels are to be installed on an existing roof, consideration should be given to the extra weight they will add. If you are planning to install panels on a new roof as part of a new build or reinstatement, it is important to be aware of the different risk implications of different roof types (e.g. flat vs pitched).

Can solar panels be installed on a combustible roof?

In general terms, solar panels should not be installed on combustible roofs unless some form of fire protection can be installed between the panels and the roof e.g. concrete panels or pebble ballast. 3. Location of solar panels

Can I install solar panels if I don't meet building regulations?

Your local authority can also apply for a Confiscation Order to take away any money you've earned with your system - so there's absolutely no benefit to installing solar panels that don't meet building regulations. It's crucial that your solar installation follows all building regulations.

What are the risks of installing a solar PV system?

The installer is also faced with the dangers of handling potentially large and heavy equipment at height as well as ensuring that the installation of a solar PV system does not have a negative impact on the strength and integrity of the building's structure (often a roof) where the system is to be mounted. All articles
