Will a lithium-ion battery energy storage system be installed in Côte d'Ivoire?

A lithium-ion battery energy storage system (BESS) made by Saft will be installed at a 37.5MWp solar PV power plant in Côte d'Ivoire (Ivory Coast). It is the African country's first-ever large-scale solar project and the batteries will be used to smooth and integrate the variable output of the PV modules for export to the local electricity grid.

Will Ivory Coast start a solar power plant?

"After having experimented with fossil fuels and hydroelectricity, [Ivory Coast], which is rich in renewable energy potential, is about to commission its first solar power plant, marking its intention to vary its energy mix as much as possible," said Noumory Sidibé, the director general of CIE

How many MW of solar power did Ivory Coast have in 2021?

According to the International Renewable Energy Agency (IRENA), Ivory Coast had 13 MW of cumulative solar capacity in 2021. This content is protected by copyright and may not be reused. How much money did Germany spend on the Ivory Coast project?

Germany's Development Bank KfW financed the EUR40 million project with EUR27 million through the German Federal Ministry for Economic Cooperation and Development. The European Union added EUR9.7 million, and the government of Ivory Coast contributed the remaining sum.

What is Côte d'Ivoire terminal?

Côte d'Ivoire Terminal was formed in 2013. Phase one of the project was handled by the Port Autonome d'Abidjan (PAA) and consisted of the deepening and widening of the Vridi Canal access channel. More than 45 hectares of land were also reclaimed for the creation of the new Côte d'Ivoire Terminal (CIT) and an adjacent Roll-on Roll-off facility.
