Who is Enphase Energy?

Enphase Energy, Inc. is an American energy technology company headquartered in Fremont, California, that develops and manufactures solar micro-inverters, battery energy storage, and EV charging stations primarily for residential customers.

What's going on with Enphase Energy?

Enphase Energy continues to be focused on its business fundamentals, working with installers, expanding to new geographies and launching new products. This idea was discussed in more depth with members of my private investing community, Outperforming the Market.

Will Enphase Energy see a strong growth in Europe?

As such, while the bottom may be somewhere around the 3Q and we may not know exactly the trajectory or timing of the recovery in Europe, Enphase Energy is doing all it can to improve its business such that when the recovery comes and the cycle turns, the company will see strong growth there.

Is Enphase Energy overdone?

The competition rhetoric seems overdone as Enphase Energy showed relative strength in the US, along with stable market share. Enphase Energy continues to be focused on its business fundamentals, working with installers, expanding to new geographies and launching new products.

Does Enphase Energy have a 4th generation microinverter?

In addition, the fourth generation battery will lower installed cost by about \$300 per kilowatt hour, enabling Enphase Energy to be highly competitive. Lastly, on Enphase Energy's commercial microinverter, IQ8P, the company has received positive feedback on the product so far.

Why is Enphase Energy under-shipping in Europe?

Apart from being underpenetrated in most of these international markets, Enphase Energy's focus on what it can control, which is its business, will position the company for significant growth when the cycle turns. Thus, due to the weak market in Europe, the company is under-shipping in Europe to react quickly to what has happened.

Enphase Energy, Inc. is an American energy technology company headquartered in Fremont, California, that develops and manufactures solar micro-inverters, battery energy storage, and EV charging stations primarily for residential customers. Enphase was established in 2006 and is the first company to successfully commercialize the solar micro-inverter, which conver...

&lt;p&gt;I have clamps at the breaker box to measure production from the panels but the app shows production that is wildly different from the utility company. It was about 10% off right after installation but has increased to 50% after about 6 months. All the solar energy goes back to the utility (i.e. none powers the actual house). Any insights for why this is?&lt;/p&gt;
