

Jbs energy solutions Norway

Engineered solutions: unique in-house designed solutions that remediate client specific well and conductor integrity challenges. Technology: innovative products that reduce operating costs, improve performance, extend well life and simplify abandonment.

JBS is a leading design / build civil and foundation contractor with thousands of MWs of renewable wind project experience. Few firms have the overall level of expertise required to engineer renewable wind energy foundations for the right balance of design efficiency, cost, overall project safety and quality, and schedule economy.

Our core service areas include: sales, rental and equipment sourcing; management consulting services; well intervention; specialist fishing solutions, and decommissioning design solutions. GS Energy Solutions: at your service.
