

Why is electricity expensive in Kosovo?

Usually, in Kosovo the imported energy is much more expensive than export. This is because Kosovo imports energy one day before needed, in the other hand energy is exported during the night when the demands are under generating level. Imports and exports have a negative impact for electrical energy price.

Does Kosovo need a lignite power plant?

Kosovo, rich in lignite coal reserves, relies on outdated Yugoslav-era power plants that cannot meet its increasing energy demands. The 2023 National Energy Strategy aims to raise renewable energy to 35% of the energy mix, reduce greenhouse gas emissions by 32%, and phase out a lignite-fired power unit by 2031.

How did Kosovo get its own energy system?

Kosovo was part of the Regional Energy Community and was connected with the regional system through interconnections with Serbia, North Macedonia, Montenegro and Albania. KOSTT made an agreement with ENTSO-Eso Kosovo gets his own independent region of energy administration. Kosovo gets full independence and control of its energy industry.

What does Kosovo's Energy Strategy look like?

The Government of Kosovo is currently finalizing a long-awaited energy strategy where it is expected to announce the eventual decommissioning of one of the coal-fired power plants, set a renewable energy target for 35 percent of all electric energy consumption by 2031, and further integrate in regional energy markets.

Which companies are affecting the energy sector in Kosovo?

Besides government institutions, there are also companies with great impact in energy sector such as Kosovo Energy Corporation (KEK), Transmission, System and Market Operator (KOSTT) and Kosovo Electricity Distribution and Supply (KEDS). A lot of legislative documents that aim the adjustment of electricity sector have been approved.

Does Kosovo have solar power?

Kosovo has the potential of capturing solar energy directly and converting it to electricity. The region of highest solar potential based on global horizontal irradiation is the southeastern part of Kosovo, centred around the city of Gjakova. Solar power is already used on the roofs of some buildings.

Countries that rely heavily on imported energy may be vulnerable to supply disruption from external events such as the Covid-19 pandemic and the war in Ukraine. In countries that export large amounts of energy, falling energy prices can also cause major economic shocks.

The activity aims to improve Kosovo's energy security by strengthening the capacity and sustainability of local institutions to advance energy market development and regional integration and to facilitate investments

in energy infrastructure.
