Is Medan a good location for solar energy production?

Medan, North Sumatra, Indonesia is a great location for solar energy production all year round because it receives a consistent amount of sunlight throughout the year.

How much solar power does Medan produce a year?

Seasonal solar PV output for Latitude: 3.5847, Longitude: 98.6629 (Medan, Indonesia), based on our analysis of 8760 hourly intervals of solar and meteorological data (one whole year) retrieved for that set of coordinates/location from NASA POWER (The Prediction of Worldwide Energy Resources) API: Average 5.12kWh/day in Summer.

What angle should solar panels be installed in Medan?

For fixed panel installations in Medan, North Sumatra, tilting your panels at an angle of 3 degrees towards the South will maximize your total yearly production from your solar panels. This is because this angle takes into account the position of the sun in relation to Medan's location near equator.

Where is Medan located?

Medan, Indonesia is located in the northern part of Sumatra Island. The topography around Medan is quite varied, ranging from flat coastal plains to hilly and mountainous regions. The city itself is relatively flat with some undulating hills.
