Will Mali get a large solar power plant?

As far as the energy transition is concerned, UEMOA has carried out an installation study for large solar power plants, identifying five sites - which include Mali - for a total capacity of 574 megawatts (MW), to be commissioned by 2030.

Is Mali a good place to invest in electricity?

To attract investment mainly from outside the country, Mali has adopted an investment code in 2012, which provides a number of benefits to private investors to develop the electricity sector, such as the waiving of minimum investment threshold requirements.

Does Mali have access to electricity?

Access to electricity in Mali as in the majority of countries in the ECOWAS region is low, with sharp disparities across urban and rural areas. Only half of the urban population has access to electricity whereas in the rural areas, access is limited to only 16.7% of the population.

Is Mali a member of ECOWAS?

Mali is a member of the West African Power Pool, a specialised institution under ECOWAS whose aim is to integrate the operations of national power systems into a unified regional electricity block. In addition, the country belongs to the ECOWAS Regional Electricity Regulatory Authority responsible for cross-border electricity exchange regulation.

In energy-poor areas of the Sahel, such as Mali, where the rate of rural electrification rarely exceeds 20%, decentralized energy solutions (micro power stations, mini-grids) can promote local processing and support the development of basic services and agricultural and craft value chains.
