

Mogobe bess Central African Republic

What is the Mogobe Bess project?

The Mogobe BESS project is a first of a kind and reaffirms our standing as a leading renewable energy player in South Africa. We continue to see attractive growth opportunities in the market based on the need for growth in power generation, our strong position in the country and our strong and competent local team," says Scatec CEO Terje Pilskog.

Where is Bess located in Africa?

Replicating successes from our hybrid solar and battery storage projects at Kenhardt, we will proceed to construct one of Africa's first and largest standalone dispatchable BESS systems. The project is located near Kathu, Northern Cape, close to high power demand centres.

Does Scatec own Mogobe & Perpetua?

Scatec will own 51% of the equity in the project with Perpetua Mogobe (RF) (Pty) Ltd owning 46.5% and a holding company of the Mogobe Local Community Trust 2.5%. Scatec will be the engineering, procurement, and construction (EPC) provider and provide operations & maintenance (O&M), as well as asset management (AM) services to the project.

Located near Kathu in the Northern Cape province, the 103-MW/412-MWh Mogobe BESS will be majority owned by Scatec with a 51% shareholding, while its partners -- Perpetua Mogobe (RF) (Pty) Ltd and the holding company of the Mogobe Local Community Trust, will have 46.5% and 2.5%, respectively.

Norwegian renewable power producer Scatec ASA (OSE:SCATC) has been awarded preferred bidder status for the 103-MW/412-MWh Mogobe/Ferrum battery energy storage project under the South African battery storage procurement programme, the company announced on Thursday.

Mogobe BESS was awarded a 15-year power purchase agreement (PPA) under the first bid window of the Battery Energy Storage Independent Power Producer Procurement Program (BESIPPPP) in South Africa. As part of the PPA, Scatec will receive payments for making the storage capacity available for the National Transmission Company of ...

The estimated cost of the Mogobe BESS project stands at ZAR 3bn (US\$170m), with the primary funding -- about 90% -- sourced from non-recourse project debt. This considerable sum, specifically ZAR 2.7bn (US\$154m), is being facilitated through the Standard Bank of South Africa, serving as the mandated lead arranger.

Programme (BESIPPPP) bidding round have advanced to commercial close and will now enter construction. The projects, named Mogobe BESS and Oasis Mookodi, have a combined capacity of 180 MW/720 MWh, and will be connected to transmission substations located near to Kathu in the Northern Cape and Vryburg in
