

Atlantic Green has chosen Ameresco and Envision Energy to build the 300 MW/624 MWh Cellarhead battery energy storage project (BESS) in the West Midlands, UK. The Cellarhead BESS marks a significant milestone for Atlantic Green's development and sustainability goals.

The Cellarhead BESS project will be powered by Envision's battery energy storage system and will be connected to National Grid's Cellarhead sub-station. As part of the BESS project Ameresco entered into an ...

The Cellarhead project will use Envision Energy's BESS technology and is planned to enter construction in the first half of the year. Touted as one of the largest British battery sites, it is expected to secure grid connection by the middle of 2026 and become fully operational at the end of the same year.

Atlantic Green has signed a deal worth almost £200 million with Ameresco, which will build a new 300MW battery energy storage system (BESS) alongside Envision Energy. The Cellarhead BESS project will be connected to ...

With a mission to develop a c.2 GW capacity of battery energy storage to fuel the UK's clean energy transition, the Cellarhead BESS represents a key milestone for both Atlantic Green's development journey and wider ...

With a mission to develop a c.2 GW capacity of battery energy storage to fuel the UK's clean energy transition, the Cellarhead BESS represents a key milestone for both Atlantic Green's development journey and wider sustainability objectives.

The 300 MW/624 MWh Cellarhead BESS will be connected to National Grid's Cellarhead substation in the West Midlands and will play a critical role in stabilizing the UK electricity grid. The project, unveiled earlier this year, is developed by Atlantic Green in partnership with system integrator Ameresco and clean energy manufacturer Envision ...

The Cellarhead BESS project will be powered by Envision's battery energy storage system and will be connected to National Grid's Cellarhead sub-station. As part of the BESS project Ameresco entered into an EPC and O& M contract including battery supply, balance of plant, warranty, and availability guarantees.

Ameresco, Inc., a leading cleantech integrator specializing in energy efficiency and renewable energy, today announced that Ameresco and Envision Energy have been chosen by Atlantic Green to build the Cellarhead project, a 300-megawatt (MW) battery energy storage project (BESS) with a maximum energy capacity of 624 megawatt hours (MWh). The ...
