

Namibia leverages solar potential to fuel its energy transition, aiming for sustainability and reduced import dependency amidst growing regional demand and technological advancements in renewable resources.

Namibia has much larger solar and renewable energy development aspirations, as well. Both Namibia and neighboring Botswana are working with the World Economic Forum's (WEF) Global Future Council on Energy to develop a huge, five-gigawatt (GW) ...

With an average of ten hours of sunshine per day, Namibia is one of the world's sunniest countries. It has enormous potential for solar energy yet, 60% of the country's energy is imported from neighbouring countries and 40% of its population is disconnected from the grid.

Where do you see the most growth opportunities in Namibia over the next five years? We see a lot of development and growth in the renewable energy space fuelled by an abundance in solar and wind energy resources, a regional ...
