

Natron company Nicaragua

What is Natron Energy?

At Natron Energy, we're changing the way the world looks at critical power and industrial batteries for high-powered applications like AI, data centers, peak shaving, and power quality management. Natron sodium-ion solutions outperform, are significantly safer, and are far more sustainable than lithium-ion options. Who is Natron Energy?

Is Natron Energy a publicly traded company?

Natron Energy is a privately held company and while we appreciate the immense interest from individual investors, there are no publicly traded stocks, nor individual investment opportunities available. Our unique sodium-ion batteries deliver superior performance, safety, and sustainability compared to traditional alternatives.

Is Natron Energy a leader in sodium-ion battery technology?

In conclusion, Natron Energy's advancement in Sodium-ion Battery technology represents a significant step forward. The company's dedication to innovation and sustainability positions them as a leader in the energy storage industry.

Who makes Natron batteries?

Build America. Buy America. With products sourced from minerals readily available in the U.S. and manufactured in Michigan, Natron Energy is a U.S. company that meets BABA requirements. The Power of Blue. The secret behind Natron's sodium-ion batteries is our patented use of Prussian blue electrodes.

What energy storage solutions does Natron offer?

Natron offers energy storage solutions for both in-rack and centralized power architectures. For in-rack power, a 48V, 8kW battery tray is deployed alongside data servers for local energy management services. For centralized power, a 480V, 500kW battery cabinet is paired with an uninterruptible power supply (UPS) for site-level energy services.

What are Natron batteries used for?

Our batteries provide backup and supplemental power and support decarbonization in data centers, oil and gas, aviation, solar and other industrial environments. Natron's sodium-ion batteries outperform lithium-ion and lead acid batteries in power density, recharging speed, and expected cycle life.
